Subject: DivSeek introduction
Date: Monday, January 19, 2015 9:20:54 AM

Peter, I'm using this email to introduce you to Roberto Papa (Ancona University in Italy). We are part of a pending (recommended for funding) EUCAP project that would play into DivSeek—genotyping and phenotyping large sets of Phaseolus accessions. Roberto is the PI and as we intend to use DivSeek, I thought an invitation would be good.

Roberto, Peter used to be at CYMMIT where he ran the Seeds of Discovery project (<http://www.cimmyt.org/en/where-we-work/global-activities/seeds-of-discovery>).

Scott
