FYI. They also said that Hari is being forced to take retirement shortly, so it may be a moot point in a bit.

Hi Scott,

I just had a chat with Paula about your ICRISAT peanut story. She wasn't exactly surprised and agreed that this is not acceptable. She is suggesting you send a message to her (paula.bramel@croptrust.org) and Charlotte Lusty (charlotte.lusty@croptrust.org the CRP coordinator at the Trust), basically expressing your surprise at the way this is being handled at ICRISAT and 'innocently' wondering whether this is a common practice across the CGIAR genebanks... Hopefully this would prompt some action on our part! You may also want to copy Peter into it and me if you want.

Cheers,
Hannes
