Hi Howard,

Peggy and I are co-organizing a meeting on crop genomics and breeding with JERemy Schmutz at HudsonAlpha. We are raising funds to help support the meeting and the attendance of students/postdocs and folks from developing countries. Please see the attached. Any chance that hte PF would be interested to sponsor at some level. There will be a large number of peanut researchers there and, in fact, we probably should hold a genomics consortium meeting there as many of the participants will be in attendance.

Thanks and hope all is well in Big Canoe,

Scott
