Good suggestion, Jianming. Nothing is set in stone now and we can make those adjustments. Please make it to the spreadsheet with your other suggestions.

Please take a look at the enclosed spreadsheet and make suggestions about the sessions and if people should be moved to other sessions. If you have ideas for naming the more amorphous sessions that would also be very helpful. I've configured the agenda right now for maximum speaker number, but it be adjusted as we find out interest from people submitting abstracts.
