Folks, an update for our meeting in San Diego. I just got the room assignment below.

Genomic of Soybean Germplasm Collections on Monday January 11, 2016 from 10am-12:30pm in the Brittany Room. This meeting room is located in the Regency Conference Center close to Charlie's Restaurant.

I propose to follow a similar format to the last meeting with country updates and then a discussion of the bullets from the meeting in Seattle last year (attached).
