Hi Catherine, Glad you will be able to participate. I think some perspective on how well genomic tools have been integrated in industry would be useful. Especially for crops where application of genomics may have been slower (e.g. non maize, rice or soy).

Dear Deborah and Scott,

Thanks very much for the kind invitation. This looks like a great meeting and I am happy to accept. I should be in the US at that time (I am commuting quite often between the US and Europe although but I am based in the US in principle) which will make the travel easier.

Will be happy to touch base later on with you to get a more precise idea of what you want me to cover and to which session you think I can contribute. I assume you want me to cover wheat genomics/sequencing but it would be good to know how much of the "industry" view you want in the presentation too.

Thanks again for the opportunity to contribute

Best regards

Catherine

Dear Dr. Feuillet,

On behalf of the scientific organizing committee for The University of Georgia/HudsonAlpha 2015 CROPS Genomics Enabled Crop Breeding & Improvement conference, we would like to invite you to be a speaker at the 2015 CROPS event.

This international conference is planned for Monday, May 18- 21, 2015 and will be held on the HudsonAlpha biotechnology campus in Huntsville, Alabama. We expect an estimated 300 attendees at the event.

The committee believes strongly that you are one of the leading researchers in emerging genomic technologies and their application to crop improvement and that your talk will be a compelling example of applying new genomic technology to crop improvement.

The CROPS program will feature presentations on topics including: Integrated breeding platforms, large scale GWAS, applications, genomic selection strategies, systems biology approaches, identifying markers for breeding, functional validation of targets, applications to developing world germplasm, high throughput phenotyping, and targeted genome modification.

While we know there are many competing demands on your time, we hope you will seriously consider making room for this important event in your busy schedule this spring. A copy of the tentative conference agenda is attached along with some information about HudsonAlpha and the city of Huntsville, Alabama.

HudsonAlpha will cover your round-trip airfare,

and travel expenses for this event. We would be most grateful if you could reply with your acceptance by Tuesday, November 25, 2014.

Sincerely,

Deborah Powell
