Rajeev, maybe we can talk in Canada. I have a postdoc that may be interested in spending a few weeks/months at ICRISAT. she's working on marker development in peanut and it would be a good way to keep our collaboration moving forward. Thoughts?

Thanks, Scott. So nice of you.

Christian can suggest further and I very much hope that he can keep your presentation after 23rd!

Many thanks and kind regards

Rajeev

I think I can do this but I wouldn't be able to arrive until the morning of the 23rd as I'm hosting a seminar speaker at UGA on the 22nd.

Dear Scott

Hope that you are doing good. I am writing this mail on behalf of Prof Christian Jung of University of Kiel, Germany. He is organizing a meeting entitled "Genetic variation in plant breeding". Details about this meeting are available at <http://www.plantbreeding.uni-kiel.de/de/gpz2014> . For this meeting, we would like to invite you to speak on a topic related to legume genomics, genetics and breeding. Hope that you should be able to accept this invitation.

In fact, I was also planning to participate in this meeting. However as I will be in Governing Board meeting of ICRISAT at the same time, I will not be able to

participate in this exciting meeting. However I am very sure that you will enjoy meeting very much and of course Kiel.

We would appreciate to receive your response on above soon so that Christian can finalize the programme.

Many thanks and kind regards

Rajeev
