Dear Dr Jackson,

I've not yet received a response from you with regard to the invitation to submit a review article to the Genomics special issue of *Plant Biotechnology Journal* (see below). As the editorial team are keen to have you on board with this exciting special issue, and in order to be able to plan for submissions, could you please let me know whether or not this is something that you'll be able to contribute towards.

I look forward to your response.

Kind regards,

Jim

Subject: Plant Biotechnology Journal Special Issue: Genomics - an invitation to submit (SIG1.3)

Dear Dr Jackson,

Plant Biotechnology Journal Special Issue on Genomics

To acknowledge and highlight the significant findings and advancements that have been made in the field of plant genomics during recent years, The Plant Biotechnology Journal and its editors believe it is timely to present the scientific community with a special issue dedicated solely to Genomics. *Plant Biotechnology Journal* intends to publish a special issue in the Autumn of 2015. The general aim of this special issue is to focus on advances in plant genomics and its application for applied crop improvement. The special issue will comprise updates on genome sequencing projects and advances in genotyping. In addition, the issue will contain articles describing specific applications of genomics to crop improvement.

Accordingly, we would like to invite you to contribute a 'Review article' for inclusion in this special issue. You can identify a suitable topic and co-authors to help as you see fit. The special issue editors will then consider your chosen topic and advise as appropriate should there be any overlap with other submissions. The complete range of invited authors for this special issue is enclosed below.

First drafts should be submitted by **15th May 2015**. To maximize accessibility, articles should be concise, at around 10 printed pages for most contributions (around 7000–9000 words and seven tables/figures). However, we recognize that some articles may need to be longer, so please let the Editorial Office (plant-biotechj@wiley.com) know if you anticipate this being the case for you.

All contributions will undergo the normal peer review process, and will be sent to a number of experts, who will be given guidance on the aims of the special issue and asked to provide constructive feedback and suggestions for improvement.

Please let me know within the next two weeks (**20th March 2015**) if you are interested in contributing to this special issue – supplying a working title and names of any co-authors should you have any

We very much hope that you will be part of this exciting initiative, and look

forward to your response.

With best regards,

Professor Dave Edwards, Special Issue Editor, dave.edwards@uwa.edu.au

Dr Rajeev Varshney, Special Issue Editor, R.K.Varshney@CGIAR.ORG

Professor Henry Daniell, Editor-in-Chief, hdaniell@upenn.edu
