One day. I'll reserve a room with two beds. If you can make it, you can camp with me--if you're ok with that.

Hi Scott,

That sounds very intriguing. Are most people checking in on the 15th and checking out on the 17th? So this would be a one-day thing, on the 16th?

My biggest issue is my teaching schedule (I have two full classes this semester), but I would love to attend. When do you need to know by?

Thanks,
Bob

Bob,

I'm organizing a small meeting, fewer than 15, to discuss the application of genomics to helping better utilize useful diversity in the soybean germplasm collections. Reps from China, Japan, Brazil, CG, DivSeek and USDA will be there. I was wondering if you would like to attend as well. I think your work on variation in soybean and long-term interest in genetic diversity would be useful. The attendee names are below (the numbers are the dates they need hotel). It will be held in SEattle on April 16. We have no funds to support travel/hotel, for any of the attendees...that's the only caveat. Let me know if you would like to attend. We will follow with more info on the hotel and organization.
