Great. Left you v.mails suggesting how to approach the agenda item...calmly cell anytime before the mtg if you can so we have a quick coordination call.

Cheers,

Heath

Hi Todd,

The meeting is Tuesday at 7PM EDT. Can you make it?

I'll try to find you via cell tomorrow to discuss our approach to this segment of the meeting. Is there a best time to try to find you?

Thanks!

Heath Packard

Subject: Re: [gbird] participation in CBD activities

Hi Royden,

If this is the meeting next week I cannot make it. I have to be in Brussels for another meeting. Let me know if there is another way for me to participate. I may be able to skype in.

Hi Heath and Todd,

Per the email below and sequential convos with Heath and Todd, there is consensus to get this in front of the next steering committee. I will be keeping the meeting to 1 hr and 15 min and there is excessive competing priorities. As such, please keep presentation and discussion to 15 minutes. I think a plan forward (goal and such) would be helpful.

Also, an assessment of this priority, in relation to other priorities shared with GBIRD list, will be necessary, as this will be another draw on time.

I copied the organizational leads for IC and NCSU for awareness.

With Appreciation,

Royden

Subject: Re: [gbird] participation in CBD activities

Thanks Todd and Jon,

All - Attached is a briefing note that was assembled by some of our gene drive research colleagues we've been working with around the CBD COP/MOP. I think you'll find it very helpful in understanding the process.

Todd/Karl/Royden, I propose we collaborate on scheduling a briefing webinar for GBIRD partners to learn more and discuss the potential enlisting a diverse set of GBIRD experts, and others in our networks, to register to participate in the online forum.

Thanks,

Heath Packard

Hi Todd,

Thanks for forwarding this. It might be valuable at a NCSU GBIRd or more general GBIRd meeting to walk people through this - it's a little tough to interpret without experience in these things and it seems likely there is 'more than meets the eye' for some of those points. I'd certainly be interested to hear your take on it.

The recently announced the schedule for the upcoming activities on synbio/gene drives. It's a lengthy process but the first step is to be nominated for the online forum. A detailed explanation is attached. I'm happy to talk more with you about how the process works. I am still waiting to hear whether or not I will still be a member of the AHTEG or not.
