Hi Maciej,

I enjoyed speaking with you this afternoon regarding your work. You have done well finding those in the field (3 of the 4 being involved with GBIRD). I have copied Fred and Dan, with whom you already have spoken. I do not know Malcolm, but I know of the effort on Nantuket Island.

I understand you will be coming to NCSU in July. I have copied the other GBIRD Steering Committee member from NCSU, John Godwin, as I believe he will be back from his field work at that time. I propose to move forward with the plans already being put into place with the NCSU visit and Fred, John, and/or Dan can discuss both the GBIRD program and your work in depth, then with the Steering Committee if desired.

For those copied, here is the pre-print of Maciej's work:

Subject: Conversation

Hi Royden,

It was great talking with you today and I'm happy to know that I am getting in touch with the right people.

One person that I forgot to mention I contacted is Malcolm MacNab; he's on the board of health of the island of Nantuket which is considering genetic approaches to combat lyme disease in mice.

Thanks,
Maciej
