Thanks Todd and Jon,

All - Attached is a briefing note that was assembled by some of our gene drive research colleagues we've been working with around the CBD COP/MOP. I think you'll find it very helpful in understanding the process.

Todd/Karl/Royden, I propose we collaborate on scheduling a briefing webinar for GBIRD partners to learn more and discuss the potential enlisting a diverse set of GBIRD experts, and others in our networks, to register to participate in the online forum.

Thanks,

Hi Todd,

Thanks for forwarding this. It might be valuable at a NCSU GBIRD or more general GBIRD meeting to walk people through this - it's a little tough to interpret without experience in these things and it seems likely there is 'more than meets the eye' for some of those points. I'd certainly be interested to hear your take on it.

The recently announced the schedule for the upcoming activities on synbio/gene drives. It's a lengthy process but the first step is to be nominated for the online forum. A detailed explanation is attached. I'm happy to talk more with you about how the process works. I am still waiting to hear whether or not I will still be a member of the AHTEG or not.
