Nice one.

From a PF2050 perspective, I'd be grateful if the line is that genetic biocontrol approaches are being explored along with the range of other potential approaches – the aim is to provide the NZ public and policy makers with the information that they need to decide what approaches (with genetic biocontrol being one possible) they want to take to achieve the goals.

Thanks, Dan.

Subject: [gbird] NZ Radio Interview

Hi all,

I have a live interview with NZ Radio this afternoon on 2050 Predator Free NZ and the GBIRD investigation. I wanted to be sure to follow our media communications protocols and let you all know. I'll be sure to connect you if/when they want to go deeper than a general overview of our investigation.

Best,

Heath Packard
