Thanks for forwarding these Dan - interesting reading on the first and just perused the second so far, but certainly a huge effort there and definitely looks like it could provide the foundation for a useful contribution.

Rgds, John

Hi All

A couple of reports to share.

The first is just a general background review of attitudes to pest control methods in NZ - <http://www.landcareresearch.co.nz/publications/researchpubs/LC2789-Literature-review-invasive-species.pdf>

The second one, an annotated bibliography on 'Potential ethical issues and unintended effects of CRISPR gene editing and gene drives for invasive species control', is attached here. This one isn't publically available yet, and I was wondering whether it's something we could build on as a group for a cross-GBIRD publication? Let me know what you all think.

Cheers, Dan.
