Hi GBIRD partners,

GES Sr. Research Scholar Dr. Todd Kuiken will join Frank Stasio for a conversation about the latest research into synthetic biology, some of the opportunities these technologies present, potential drawbacks and conversations we are or should be having about their regulation.

Here is the link for those outside the Central NC radio market. For those not in the area, Frank has keen interviewing skills – it should be good.

Livestream link: <http://wunc.org/programs/state-things#stream/0>

Warm Regards,

Royden

J. Royden Saah
